At-a-glance comparison table

Key: ✓ = available or clearly supported; ✗ = not found or not core functionality; △ = available in some deployments, requires configuration, or needs study-specific confirmation.

Platform	Recruitment and enrolment	Eligibility screening	eConsent	Smartphone app-based data collection	Wearable integration	Participant engagement and retention	Study management	Data storage and export	Reporting and analytics	Best research fit
Apple ResearchKit	△	✓	✓	✓	△	△	✗	△	✗	Custom iOS research apps requiring onboarding, consent, surveys and active tasks.
Apple SensorKit	✗	✗	✗	✓	✓	✗	✗	△	✗	Approved iOS studies needing granular iPhone or Apple Watch sensor and usage data.
AWARE Framework	✗	✗	✗	✓	△	△	△	△	△	Open-source smartphone sensing and digital phenotyping studies needing flexible passive mobile context data.

Platform	Recruitment and enrolment	Eligibility screening	eConsent	Smartphone app-based data collection	Wearable integration	Participant engagement and retention	Study management	Data storage and export	Reporting and analytics	Best research fit
Beiwe	△	✗	✗	✓	✗	△	✓	✓	✓	Academic digital phenotyping studies needing passive smartphone sensor and usage data.
DAISER	△	△	△	✓	✓	✓	✓	△	✓	Configurable digital health applications combining engagement, sensors, diagnostics and AI-enabled workflows.
Empatica	✗	✗	✗	✓	✓	△	✓	✓	✓	Wearable physiological monitoring, digital biomarkers and remote data collection.
Evidation	✓	✓	✓	✓	✓	✓	✓	△	✓	Large-scale real-world evidence and participant engagement studies.

Key: ✓ = available or clearly supported; ✗ = not found or not core functionality; △ = available in some deployments, requires configuration, or needs study-specific confirmation.

Platform	Recruitment and enrolment	Eligibility screening	eConsent	Smartphone app-based data collection	Wearable integration	Participant engagement and retention	Study management	Data storage and export	Reporting and analytics	Best research fit
Eureka	✓	✓	✓	✓	✓	✓	✓	✓	✓	Online, mobile and hybrid medical studies needing remote enrolment, consent, surveys and device data.
Evinova	✓	△	✓	✓	✓	✓	✓	△	✓	Enterprise digital, hybrid or decentralised clinical trials.
Mind-LAMP	△	✗	✗	✓	✓	✓	✓	✓	✓	Digital mental health and behavioural studies needing sensing, surveys, engagement tools and dashboards.
MyData-Helps	✓	✓	✓	✓	✓	✓	✓	✓	✓	Remote, hybrid and digital health studies combining consent, surveys, wearables and EHR data.

Key: ✓ = available or clearly supported; ✗ = not found or not core functionality; △ = available in some deployments, requires configuration, or needs study-specific confirmation.

Platform	Recruitment and enrolment	Eligibility screening	eConsent	Smartphone app-based data collection	Wearable integration	Participant engagement and retention	Study management	Data storage and export	Reporting and analytics	Best research fit
RADAR-base	△	✗	✗	✓	✓	△	✓	✓	✓	Open-source active and passive remote monitoring using smartphones and wearables.
REDCap	△	✓	✓	✓	✗	△	✓	✓	✓	Secure databases, surveys, multi-site studies and offline form-based data collection.
Studypages Data	✓	△	△	✓	✗	✓	✓	✓	✓	Clinical research EDC, registries, ePRO, online surveys and offline mobile data collection.

Key: ✓ = available or clearly supported; ✗ = not found or not core functionality; △ = available in some deployments, requires configuration, or needs study-specific confirmation.
